a/ µg/kg = micrograms per kilogram;

U = Analyte not detected above reporting limit (RL);

J = Analyte is less than the RL but greater than or equal to the MDL and the concentration is an approximate value;

F1 = MS and/or MSD Recovery exceeds the control limits;

F2 = MS/MSD RPD exceeds control limits;

* = LCS or LCSD is outside acceptance limits;

b/ Total PCBs are the sum of detectable concentrations of the individual aroclors.

c/ Duplicate of previous sample

d/ "M" at end of sample identification indicates that sample was collected from the mezzanine level of the interior breakroom or office space
